

Field Events: Schools are in charge of the events. You should have at least three people at the event. High school students may help by raking, stretching a measuring tape, or calling names. High school students **may not** judge the event. **Please bring your own measuring tape to judge your assigned event.** The number in () indicates the number of people needed at the event.

Each school MUST provide at least one adult worker to help with an event. The other workers needed can be high school students. Please realize that EVERY school attending is small and has difficulty finding volunteers. This is NOT a legitimate reason for not providing workers. If you want to attend this meet you MUST provide workers.

Please indicate three choices where your school is willing to work/run the event.
